Service Bulletin

TCS - Titan Control Software v3.1.9

Applicability: This new release is recommended for all Titan product users.

Description: Titan Control Software version 3.1.9 incorporates the following feature enhancements and bug fixes:

1. Implemented Error Logging
2. Added 'Error' hyperlink to the Export screen
3. Enabled File Partitioning for CPU & CPX devices
4. Increased the number of samples for the Capture function from 30K to 1.2M
5. Improved the response to the 'Get Info' request message

TCS v3.1.9 is available as an *Installer* that includes all required support files as well as an update to the embedded User Manual that provides context-sensitive help.

Update: Download TCS v3.1.9 from the Mars Labs Knowledge Base:
